

Proof Statement & Justification

Defining the exact claim, target audience, and primary action to eliminate decorative fluff.

01 / DELIVERABLE: ONE-PARAGRAPH PROOF STATEMENT

I help **VP of Engineering Sarah Jenkins at early-stage B2B SaaS startups** who are scaling past product-market fit build **usable, accessible web applications that measurably reduce customer onboarding churn**. Instead of offering generic creative design, I execute end-to-end design systems and complex workflow simplifications backed by user research and production-ready React component architectures. If you need a designer who can bridge the gap between complex backend logic and intuitive frontend interfaces to unlock your next retention benchmark, **book a 15-minute introductory technical alignment call directly on my calendar**.

02 / DELIVERABLE: THE ONE-LINE WHY

Why this must exist: A standard CV or LinkedIn profile only lists job titles and keyword buzzwords, but it completely fails to prove my specific capability to translate complex technical workflows into conversion-driven, accessible UI design that directly impacts software retention metrics.

03 / STRATEGIC BREAKDOWN & PASS CRITERIA

CORE REQUIREMENT	DEFINED TARGET	WHY IT SATISFIES THE BRIEF
1. Primary Claim	Usable SaaS UI Design	Names a singular, verifiable execution skill (reducing onboarding churn via usable UI) rather than vague self-labels like "creative thinker."
2. Primary Person	VP of Eng / Sarah Jenkins	Targets a specific decision-maker at early-stage B2B startups rather than an abstract "hiring manager" or "everyone."
3. Single Action	Book 15-Min Intro Call	Establishes one clear, high-intent call to action instead of splitting focus across multiple competing options.

04 / SELF-AUDIT CHECKLIST

- ✓ **Single Skill Focus:** No secondary skills hiding behind "and" or blanket buzzwords.
- ✓ **Decision-Maker Persona:** Formulated specifically for a person empowered to hire/engage.
- ✓ **Unambiguous Conversion Goal:** One clear call to action defined for immediate next step.
- ✓ **Falsifiable Proof:** Describes a specific track record that cannot be claimed by generic portfolio templates.
