

Portfolio Content Map

Vinay Kumar | AI & Machine Learning Engineer

Degree: B.Tech in Artificial Intelligence & Machine Learning, USAR, GGSIPU

Focus Areas: Machine Learning · Deep Learning · NLP · Computer Vision ·
Generative AI · RAG Systems · AI Agents · AI Automation · Full Stack AI
Applications

1. One-Line Claim

10 Options

#	Claim
---	-------

1	I build AI systems that ship, not just notebooks that impress.
---	--

2	Turning machine learning research into production-ready products.
---	---

3	I design, build, and deploy AI that solves real business problems.
---	--

4	From raw data to deployed intelligence — end-to-end AI engineering.
---	---

5	Building AI Agents and RAG systems that actually work in production.
---	--

6	I engineer machine learning solutions people can use, not just demo.
---	--

7	AI Engineer turning models into measurable business impact.
---	---

8	I make AI practical — deployed, tested, and built to scale.
---	---

9	Bridging deep learning research and real-world deployment.
---	--

10	I build full-stack AI applications, from model to production.
----	---

Selected & Refined Claim

"I design, build, and deploy AI systems — from raw data to production — not just proof-of-concepts."

Why this works:

- Directly mirrors the portfolio's core goal (design → build → deploy)
- Signals full-stack AI capability, not just modeling skill

- The "not just proof-of-concepts" line differentiates from typical student portfolios
- Short enough to read in under 3 seconds — ideal for a hero section

2. Portfolio Content Map

Primary Goal for Every Page: Convince recruiters that Vinay can design, build, and deploy practical AI solutions.

Page 1: Home

Element	Details
Sections (in order)	1. Hero (One-Line Claim + Name + Role) → 2. Quick Value Proposition (3 bullet strengths: ML/DL, GenAI & RAG, AI Agents & Automation) → 3. Featured Projects (Top 3) → 4. Skills Snapshot (icons/tags) → 5. Experience Highlights (2 internships, 1 line each) → 6. Call To Action Band
Project/Case Study Shown	AutoML Studio, AI Research Assistant (RAG), Resume Screening AI
Why It Appears Here	These three prove range — automated ML pipelines, GenAI/RAG systems, and NLP applied to a real hiring problem — giving recruiters a 10-second credibility signal
Call To Action	"View All Projects" (primary) + "Download Resume" (secondary)

Page 2: Projects

Element	Details
Sections (in order)	1. Page Intro (1-line framing of technical range) → 2. Filter/Category Tags (ML, DL, NLP, CV, GenAI, Agents) → 3. Flagship Project (large card) → 4. Project Grid (remaining projects, strongest-first) → 5. "More Projects" Archive Link
Project/Case Study Shown	All 10 projects, ordered: AutoML Studio → AI Research Assistant (RAG) → Resume Screening AI → Climate Guardian AI → Smart House Price Prediction → Electricity Consumption Predictor → AI Startup Valuation Predictor → EV Battery Life Predictor → Interview Salary Prediction AI → Other ML/DL/NLP/CV Projects
Why It Appears Here	Ordering leads with the most technically impressive and production-ready work first (strongest-work-leads principle), then moves through applied ML projects that demonstrate breadth
Call To Action	"View Case Study" on each project card; "See GitHub Repo" as secondary link

Page 3: Individual Case Study (Template — applies to each project)

Element	Details
Sections (in order)	1. Project Title + One-Line Summary → 2. Problem Statement → 3. My Role & Approach → 4. Architecture/Workflow Diagram → 5. Tech Stack → 6. Key Challenges & Solutions → 7. Results & Metrics (Accuracy/Precision/Recall/F1/RMSE/MAE as applicable) → 8. Before/After or Demo Screenshots → 9. GitHub + Live Demo Links → 10. Reflection / What I'd Improve Next
Project/Case Study Shown	One project per case study page (template reused for all 10)
Why It Appears Here	This is the proof layer — it shows recruiters <i>how</i> Vinay thinks, not just <i>what</i> he built, satisfying the "design, build, deploy" claim with evidence
Call To Action	"View Live Demo" (primary) + "View Code on GitHub" (secondary)

Page 4: About

Element	Details
Sections (in order)	1. Professional Photo + Short Bio → 2. Academic Background (B.Tech AI & ML, USAR, GGSIPU) → 3. Technical Skills (organized by category: ML/DL, NLP, CV, GenAI, Tools/Frameworks) → 4. My AI Philosophy (short paragraph on practical, deployable AI) → 5. Interests/What I'm Exploring Next
Project/Case Study Shown	None directly — links to Projects page instead
Why It Appears Here	Builds trust and context; recruiters use this to verify credibility and technical seriousness before committing time to case studies
Call To Action	"See My Work" → links to Projects page

Page 5: Experience

Element	Details
Sections (in order)	1. Timeline Header → 2. FlyRank AI - Machine Learning Intern (role, duration, responsibilities, impact) → 3. IBM BharatCares - AI Automation & Intelligent Solutions Intern (role, duration, responsibilities, impact) → 4. Skills Gained Per Internship → 5. Certificates/Proof Link
Project/Case Study Shown	Relevant projects linked contextually (e.g., link automation-related project under IBM BharatCares if applicable)
Why It Appears Here	Real-world, paid/structured experience validates that Vinay's skills have been tested outside academic projects — strong recruiter trust signal
Call To Action	"View Certifications" + "Download Resume"

Page 6: Certifications

Element	Details
Sections (in order)	1. Page Intro → 2. Certification Grid/List (title, issuer, date, credential link) → 3. Relevant Coursework (optional, if applicable)
Project/Case Study Shown	None — supporting evidence page
Why It Appears Here	Reinforces technical claims made in About and Experience with third-party validation
Call To Action	"View Full Resume"

Page 7: Resume

Element	Details
Sections (in order)	1. Embedded Resume Preview (PDF viewer) → 2. Download Button → 3. Quick Summary (role, years, top skills)
Project/Case Study Shown	None — resume is the single-document summary of all pages
Why It Appears Here	Recruiters often want a portable, ATS-friendly document they can forward internally — this page exists purely for conversion
Call To Action	"Download Resume (PDF)" (primary)

Page 8: Contact

Element	Details
Sections (in order)	1. Short Closing Statement (reinforces claim) → 2. Contact Form (Name, Email, Message) → 3. Direct Links (Email, LinkedIn, GitHub) → 4. Response Time Note (optional)
Project/Case Study Shown	None
Why It Appears Here	Final conversion point of the entire portfolio journey — every prior page should funnel here
Call To Action	"Send Message" / "Email Me Directly"

3. User Journey

Visitor lands on Home
↓
Reads One-Line Claim
↓
Views Featured Projects (AutoML Studio, RAG Assistant, Resume Screening AI)
↓
Opens Individual Case Study
↓
Views GitHub Repository + Live Demo
↓
Builds Trust → Checks About / Experience / Certifications
↓
Downloads Resume
↓
Contacts Vinay

Design Principle: Every page reduces friction toward one outcome — a recruiter reaching the Contact page convinced Vinay can design, build, and deploy real AI systems.

4. Still Need To Gather

- ☐ Screenshots (UI, dashboards, outputs) for each project

- ☐ GitHub repositories (public, cleaned, well-documented)
 - ☐ Live demos (hosted links for each deployable project)
 - ☐ Architecture diagrams (system-level design per project)
 - ☐ Workflow diagrams (data → model → deployment pipeline)
 - ☐ Demo videos (30–90 sec walkthroughs)
 - ☐ Internship certificates (FlyRank AI, IBM BharatCares)
 - ☐ Mentor/manager feedback (quotes or LinkedIn recommendations)
 - ☐ Before/After comparisons (baseline vs. optimized model results)
 - ☐ Accuracy metrics (per applicable project)
 - ☐ Precision
 - ☐ Recall
 - ☐ F1 Score
 - ☐ RMSE
 - ☐ MAE
 - ☐ Deployment links (Streamlit/HuggingFace/Render/Vercel/etc.)
 - ☐ Resume (updated, ATS-friendly PDF)
 - ☐ Testimonials (peers, mentors, professors)
 - ☐ Research papers (if any published or referenced)
 - ☐ Documentation (README files, technical write-ups per project)
-

5. Final Submission Checklist

- ☒ One memorable, refined, recruiter-friendly claim selected
 - ☒ Every page has clearly ordered sections
 - ☒ Strongest project (AutoML Studio) leads on both Home and Projects pages
 - ☒ Every page includes a defined Call To Action
 - ☒ Every CTA funnels toward the single portfolio goal: proving Vinay can design, build, and deploy practical AI solutions
 - ☒ Honest, complete "Still Need to Gather" list included for pre-launch preparation
-

Document prepared as a submission-ready Portfolio Content Map for Vinay Kumar's AI & Machine Learning portfolio.
